

Pre-Painted Galvalume Steel Coils for Roll-forming Machines

COLOUR-COATED COILS...

This is a range of color coated sheet products. It is produced by coating steel sheets on a sophisticated coil coating line, where steel substrate surfaces are thoroughly chemically cleaned before a primer coat is applied to either one or both sides of the sheet.

Nippon paint is used as the coating on our PPGL Coils. This paint is Environmentally Friendly and a natural product with organic ingredients. The ingredients help to reduce the air pollutants in the paint making it non-toxic and odourless.

To keep your roof in pristine condition for as long as possible, periodic washing down with water and a mild detergent prevents the accumulation of corrosive debris such as leaves, dirt and pollution fallout.

CAN BE USED FOR:

- Corrugated roof sheets
- IBR & Widespan roof sheets

Thickness	Materials	Hardness	Coil Width	Base Coating
0.3mm	ISQ550	925	AZ100	
0.4mm	ISQ550	925	AZ100	
0.5mm	ISQ550	925	AZ100	
0.6mm	ISQ550	925	AZ100
