

High quality standard composite pallets

STANDARD COMPOSITE...

- Our Composite Pallets are proven to be the best in Southern Africa - Tolerance around 1mm
- SABS Compressive strength test improvement up to 30% after 24 hours
- Best vibration, best compaction - saving cement: pays for pallets
- Water, weather, chemical, abrasion and air resistant.
- Due to tough nature of HDPE, PP and fibre-glass these pallets are thinner than wood
