

350L Round Type Fertilizer Spreader

AFS1 350

Built for efficient forage handling and consistent windrow formation, the Revaro Mounted Finger Rake is a reliable solution for haymaking operations. Designed to move, turn, and gather previously cut forage, this rake helps improve drying time and ensures clean, uniform windrows ready for baling. The finger wheel system gently lifts and handles the crop, reducing leaf loss and maintaining feed quality. Mounted on a standard tractor three-point linkage, the Revaro Finger Rake offers simple operation and dependable performance across a variety of field conditions, including uneven or rough terrain. With multiple drum configurations available, it can be matched to different farm sizes and productivity requirements. Efficient, durable, and easy to use - this is a practical solution for farmers looking to streamline their haymaking process and maximize crop quality.

Specs

General Specs	
Hopper Capacity	350L
Number of Disc	1pcs
Working Width	14m
Total Width	960mm
Total Length	1215mm
Total Height	1305mm
Category	I
Transmission Type	1/1
Mixing System	Vertical
PTO Rotation	540rpm
Required Power	40-44hp
Total Weight	77kg
