

Brick and Block Splitting Machine

BLOCK SPLITTER...

Our block splitters can split any size concrete block.
Split non-standard blocks with variable blades.

- Easy to operate, using 2 levers
- ? Roller system for quick block movement
- ? High hydraulic pressure
- ? Easily replaceable blade
- ? Splits bricks and blocks

Specs

Machine Specs	
Hydraulic Cylinder Piston Diametre	140mm
Oil Cylinder Maximum Trip	200mm
Maximum Pressure	30T
Downward - Upward velocity of piston	12 - 30mm/s
Oil hydraulic pump model	GBT-G532
Oil hydraulic pump pressure	25mPa
Oil hydraulic pump flow	32ml
Hydraulic pump model	Y112M-4
Hydraulic pump rated power/ speed	4kW / 1440r/m
Manual reversing valve hydraulic valve	34ST-L20H-T
Oil tank capacity	100kg
Machine weight	1100kg
Overall dimensions	1900 x 850 x 1850mm
